2 chunks floating, collect, ring (needs punch) ^{very} ~~hand~~ ^{hand}

③ Broken oil line, attempted repairs

After first dredge haul, triangular dredge,
with nothing much, but drag horn coral
frag in it, when we got ~~at~~ it we side
ride now we can go to breakfast

Jacks aqualung saved our dredge, skin diving the
other; Tichahau also quite a swimmer, goes down to
see how ~~anch~~ holds, uses only face mask no "feet"

Dances paid for now like in Navajo country
+ Africa, + must be arranged for.

Mareva:

- No radio ^{need at least for receiving}
- Leaky toilet, leaks at base in floor, + fills up night
- Refrigerator (hand operated) thermostat gone
- Auto pilot doesn't work.

It is Sunday evening Apr. 7, as I sit here in shorts in the pilot house of the Mareva (a 55 ft

It is as quiet and calm an evening as I have spent anywhere in this troubled world, balmy, cool and comfortable. The ship moored stern to is just a grassy strip from the main highway along the water front; across the street is a private residence, with just one shaded light in an upstairs room. To its left the Polynesian Hotel ^(Banned bunch) ~~dropped~~ ^{dropped} from overhead in the Captain's cabin (and pilot house where I am sitting writing by the light of my flashlight suspended over-head, for our refrigerator thermostat-less is draining the batteries so that there isn't light enough to write by.)

brilliantly illuminated above it a dimly lighted second floor reception room and below an uninviting door way with bare stair leading up beside the shuttered "drive-in" of the first floor warehouse over which the hotel stands. Little traffic passed by an occasional auto, & a few bicycles with their human cargo, French motor bikes quite noiseless compared to their brassy, noisy American counterparts. Many here are driven by a British drive upon the forward tire with a compact relatively silent aircooled engine. Next saunters by

a young couple hand in hand, summer evening lovers
in summery Sunday garb, white lawn (dainty)
dress and he in white shirt, and grey trousers.
Barring ^{name for me} the bikes you may be anywhere in this
wide world temperate or tropic, Washington
DC, Miami, Santos, Stanleyville or Nice. In
the shades of night the vegetation doesn't
show and there's nothing to tell you that you
are sitting by the waterfront, the yacht harbor
in Papeete Tahiti, glamorous Tahiti of song
and story and romance, ^{The land} of pleasant manners
^{people} Polynesian hula girls and dancers. It's just
a quite evening ^{on Main Street} at home anywhere in the world
^{Farther} ^{and out of earshot}

Down town's Quins going full blast, the boys
are there, dedering to the Sabbath day in the
pants they are wearing, men's lotion on their
stomach and an underpin deoderant in the
case of another. Funny business Sunday ^{high}
when you're raised right, yet go to a cheap
honky tonk (beer joint) and dance hall and
drink cheap beer. Saturday night they

Wed, April 10 / winter Sunday April 11
We got off at 8:07 after various
delays. R. went for laundry to take to room. I
forgot money, had to come back or delayed my
getting to stores which close at 11, got all
I was looking for except camera deck or
other small bucket, because mine we brought
was too heavy to use on the other side.
Afternoon was bright & sunny and sea
reasonably smooth, Chuck was first down.

Our first "delay" was over Jack Randall, not
really a delay. His wife came out later in afternoon
that Jack had high fever and that he
often had attacks of couple of days duration
that went away. I said if he's sick we shall
go anyway. We were all set to go & would
go through with plans; but sick as Jack
went with own dishes he said, "I've been
in 'bunk' (dorm. table) all day excepted at
reading books; This a.m. ^{Capt.} has been on
deck house seat ^{at} covered with Capt's blanket.
Captain's bunk on which he rests his
feet at wheel.

Here at 10 a.m. Capt says when I asked
for Chuck how much longer. He said 5 p.m.
Chuck had answered in I passed his door
I said to him maybe you'll be taking W. Agri

Brief glimpses of Tahiti by an out-
sider looking in

Tahiti,

The Dula girls at Quinns — bar girls
men who frequent Quinns are to all appearance
a very lot workers & about not around town
certainly dressed like day laborers
2000 Baa, darker, & perhaps not more
dingy but in the semi-ruby blackness in-
side, more of local color? Typical historic
dices & hokeri comb. There is friendliness
& good congeniality. Hospitality of Tahiti
natives. Found in a bottle of beer in a
beach joint. R. went every night after
supper, but had to wait home and posted
an office time or to speak.

Chuck repair flight to Hawaii

Bottom argument

R. ^{day later} refrigeration & light not being
M, when he said they were on.

Apr. 11, Rough run; but moderated as we neared
"Tikahau" (?) ran along reef to pass on ^{West} N side (±) end, and anchored near Jack's favorite spot. Every body
"ashore" on reef variety of corals astounding.
(Sort of trial run — showed our disorganization and lack of [dry] space on ship.)

Lagoon so large you hardly can see other side
as most or all series of connected islets.
What keeps passage open?

"micro-atoll" his words
As Jack Randall says an atoll is in an atoll. This
quite aptly describes look of this reef just East of
of passage through large reef ^{with 2 atolls Apr. 14} here and walk around
on summit of reef. Here I started crabs
coral & did not step outside 3 foot circle. It
kept me busy & I got bucket full in no time
Rahde picked up two pieces that fell away from
clump I grabbed before going aboard and as he
he said to me I brought two pieces of coral for you
two work over.

We had awfully late dinner felt sorry for
creep it was 7 p.m. before we were able to eat.

time to write any. Some done at 2 a.m.
only time and place to write.

Tom paddled around with face masks +
"duck feet". Apr. 12

Next a.m. I was busy sorting stuff Tom helped
sort as did Capt. after he got back from morn-
ing visit from outer reef. That has visit
Chuck, Tom + Rehder made while sorting. Tom on
his return helped while Chuck + Rehder
put away their stuff; got Rehder to make ^{help} list
of box contents.

April 19th When I said over previous days and
at Tackahua that I wanted to use rest of our rotenone
at places where Jack had not yet fished, I did
not suspect that he did not want me to do it but to
go home. Tried at first to persuade us to go Moore
first before Bora Bora, to use poison at good places.
Well, he had so thoroughly covered that area that there
would be little chance we'd find any thing he had
not already gotten. But when I insisted that
we would go through with plans regardless of
what made, Bora Bora first. Nothing more he
said for some time. Then just before
supper he said ~~that~~ make you a proposition.
Here are some wrassers I want to get
to photo and Rene (in Papeete) on (or near)
quarantine reef, if you will ~~let~~ me poison
reef with your rotenone, I'll do job & get
fish for you. Foolishly I agreed to this. I
wanted to help him get his wrassers. I
did not know that he had a sizable drum
of amaranth with him (in his boat) OK.
OK, so this morning at about 9
he began to mix up our rotenone

produced his large can, and ^{begin} getting things ready. The lunch went out except me. But my paper and ~~chair~~ ^{chair} ~~origin~~ came back from home. Presently 1:30. Address came back with buckets of fish, I asked "any more?" Yes, a ^{several} ~~number~~ ^{which} ~~of~~ ~~large~~ ~~empty~~ ~~boxes~~ ~~and~~ ~~what~~ ~~fish~~ was bringing out to ship, but he has made selection from all team collections. In other words he could call over every thing and segregate what ~~was~~ ^{and} ~~any~~ ^{that} ~~might~~ ^{might} anticipate the new ones, thus he may have already collected for Harry. Harm if he didn't say to me on board [after 3 p.m. lunching] I mind if I pick out grouper eggs. I want to examine stomach contents, time he picked out the grouper legs and all tiny odd fish ~~at these~~ ^{replacements} set also for Harry. Well we were used for a good thing. I need

April 20th left Cape in rain
Today Monday 22, Reindeer left glass dish
sitting right on deck but hatch cover
and planks would have thrown some one
in dark.

Tomorrow filled ice Sunday
afternoon. I had left traps off
trap otherwise would have been O.K.
If I had not injected all three milk
fish would not have frozen it.
Was the one chest not lashed. Bought
lig steel drum yet much insisted &
getting Raydell little (25 gal) one.
And argument about it, I insisted we'd
need to use larger drum & so we did after
all.

Night of April 21. Heard of dance practice
& went to see it 8:45? to 9:45 girls
team & mens team. Family & amateur
girls 17-20 wanted daylight movie &
arranged for them to come. Came nicely
garbed by shy of putting on the wiggles/
embarrassed same with girls in restaurant
looking at brassiere, (blushed or at least acted
like) (No touch when he tried put arm around.
Like Suba girls miss men, all young and
physically best spec. are rounded up to
work on Mukatea leave this bunch rather
lonely, could not ~~make~~^{get} up any sort of men's
team (dance troupe) Girls were two rows
of 8 or 9 each; men had job to get 2 rows
of five each & then most were not up to
scratch. 1/2 of girls not much good either
First girls and male ballet master. Then men
with same man leader, showed them how to
do down on hands, knees legs, feet right
& left (one step is much like old
hula trot) (knees back out forth
 only hands are not put in knee

April 22nd cont.

Dance floor next to usual Thaples
native house was former warehouse
concrete floor. Orchestra was
beat on two wooden blocks (tramped?)
drum & tin can. In one of wigs
dancers stepped up tempo till one
gial ^{actually} wore out. did look very nice -
and colorful in their dance costume

lobsters + 2 Scyllas

then 2 Scyllas

Worked at getting Tubition (Phillips)
reed (1st "pass" to left of Saggredo, sorted
& put away, in rough passage was just
clothed around in bunches.

Got through to Philip girls at 11 (about)
Had lunch aboard. 11:15 to 1:30, 2 at-
most cooked lobsters - bread & butter

Limeade to drink, cooked rice with lots
of butter. coffee & canned plums to
finish up on. Then could not get

rid of them. stayed till about 4:30 ¹⁵
Capt had to chase them ashore. But

after lunch about 1:30 (11-1:15) lunch

We went up along shore in dinghy or

3 girls went along to help and they
did. one got me the record of 3 greater

phylloids. Kids gathered around (as in
Africa) & helped much work. Came

back at 4 ± to sort stuff. Capt
brought 4 pieces bread, and had
with butter the girls had a stick half

a kind of loaf filled between with
rolls of butter, ate as though they
had had no lunch. I got worried
their hanging and down before near
my money + all as far as Rebe's
watch they (with discretion) could
not bring himself to do it + was
so far as to ask Capt. could he
trust them. Was more interested going to
water tub to wash self + bath suit.
Then slicked up hair + face. ^{quickly}
had to drive him to his husband
before supper. Any way Capt. finally
told girls to go home. Dr. Bell
put off their grass skirts all had
red + white + blue + white ^{wrap} ~~wrap~~
grounds. Well when they went home
they all left their grass skirts behind
to have excuse to come back.
Wrote before Capt. left (after practice
dance) the girls ~~dance~~ who promised
to come back to dance for money
not of Korfuge; to have her
coming back. Their long skirts
to go home, was some thing in

word, a pawn to mine returning.
They came back after supper all dressed
up to go to dancing night, brass with
2 benches (found that rattles and Pa-
reets all the time, carrying passengers
and freight)

After practice dance of 22 one group
who lived beyond our anchorage, stopped
off at Murewa + we served them coffee
+ linacade with pineapple juice in it
used about a dozen cans ~~there~~
~~four or more away~~ of it.

Then we walked (I didn't want to go
but Capt. went + asked me along + I
fell for it, to expecting to see inside
of one of mine homes, but when we got
about to end (couple of miles walk)
girls sat down on gravel coping
on one side + we on other. After a while
+ Capt. Jim's flash light + walkie talkie
to Murewa on dark in dark with
road, flashing light on + off to mine

not walking off side of road. Beke
long rest turned up with girls
again sat out on back deck, part
time girls sang (I thought they
nearly to make music for dance
looked like walk to me for where
I was in my bunk. One replied I
had brought tape recorder. The next
lines. I stayed around till 12 some
a was not one when the boys let girls
go home alone, left the flash lights
to get back with. I asked why
didn't they go back half way at least
with them. Girls pulled on
candles in room in bare feet as
to feel their soles via carpet. &
they were surprisingly soft, go
to the foot all time. Large broad
but perfect feet & nails, though
often badly scarred; toes fairly
short & stubby but well formed &
of course no corns.

10th Ruder went ashore for laundry to take to room
after going there in a.m. to get mended with shirt
just time after laundry left. Moped home, 2nd
time stayed till and stores close at 11 a.m.

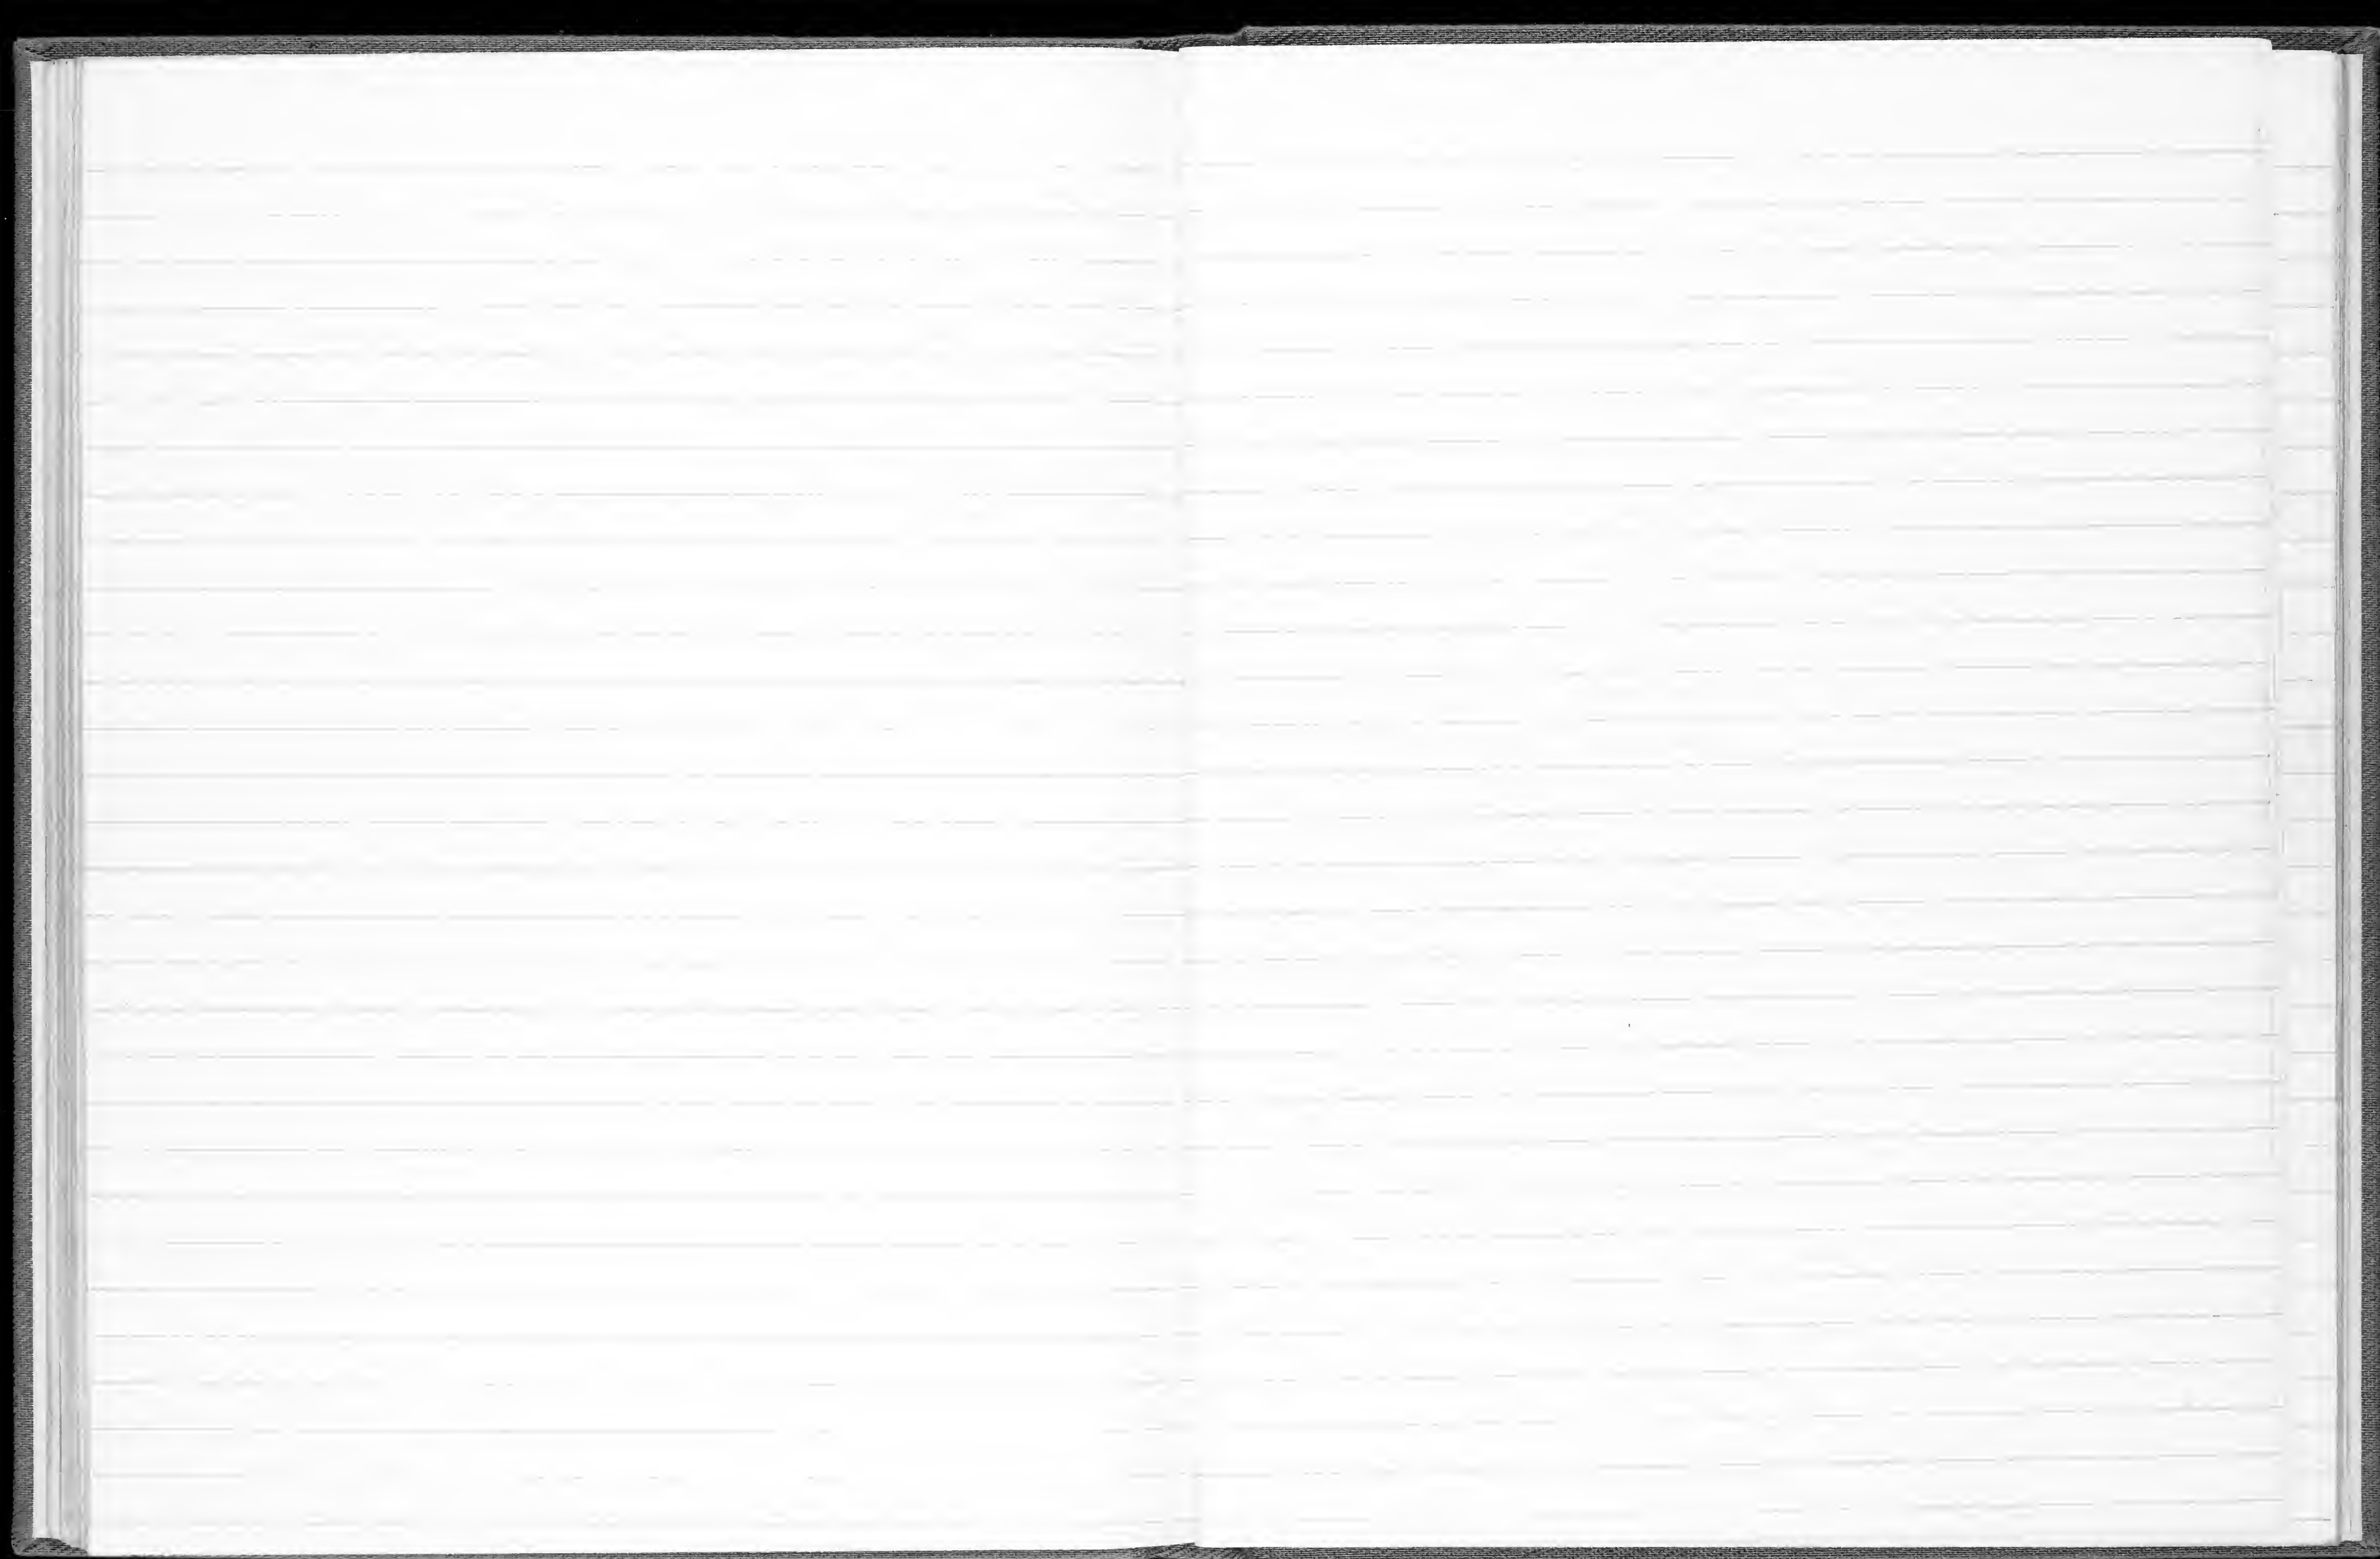

~~Apr. 11, 1957~~ Apr. 11, 1957
Set retention up on high side of Salina's
room on bench, and on top of that open
cabinet of dozen quarts, number filled with
formalin, dumped over and leaked 1/2 of the
formalin solution on galley floor, +

All formalin in one tank lost lot in 8 gal
+ tank of mixture in 16 which sprung
a leak.

Always check lashings and tank fastenings
regardless of whether you think they are tight
(secure) or not.

Apr. 23 had to send prettyed up Rehder out
with trap. Came back and said may have
lost it in deep hole could not see float.
(Face mask & bag (muslin) collector ~~carries~~
carries no tools, rarely bottles, one day just
grabbed bucket filled with jars of specimens
so had no jar available for self or any one
else.
